DRINKING WATER QUALITY CONFERENCE

30 June – 1 July | NCC, Birmingham

11TH ANNUAL

250+ attendees

30+ industry expert speakers

8+ insightful content sessions

3+ hours of networking

As the sector continues to work towards delivering AMP8's promises, public scrutiny, regulatory requirements and risks to supply continue to add pressure. With this AMP seeing an unprecedented level of investment in drinking water, sector professionals face mounting expectations to perform at the very highest level.

With this surge in spend comes greater scrutiny on efficiency, innovation and value. Companies will be challenged to deliver ambitious business plans, secure resilient supply chains and develop fresh, practical solutions that can be delivered at pace.

The Drinking Water Quality Conference 2026 brings together leaders from across this dynamic sector to explore shared challenges and exchange best practice.

Delegates will examine the implications of new and emerging regulation and legislation and hear from senior figures on managing risk and safeguarding public health - supported by innovative approaches and new partnerships. Further themes include emerging contaminants, environmental protection, resilience, smart networks and monitoring.

I look forward to welcoming you to the conference later this year to explore these critical issues and to connect with peers from across the sector.

FEEDBACK

'Excellent quality of Speakers throughout the day who were honest, shared case studies and provided good insight into real events.'

Water Quality Manager, SES Water

'A great variety of subjects and delivered with such passion. A great event to hear how the rest of the industry are tackling some of the challenges we all face.'

Water Quality Manager, Affinity Water

'The top water quality minds in one place. What more could you want?'

Senior Principal Consultant, Stantec

'Attending the Drinking Water Quality Conference was an incredibly enriching experience. The event brought together leading experts, innovative technologies, and real-world case studies that deepened my understanding of water safety and sustainability. The sessions were not only informative but also inspiring, highlighting the critical importance of collaboration in ensuring access to clean, safe drinking water for all. I left the conference feeling empowered and better equipped to contribute to meaningful change in the water sector. Highly recommended for professionals and advocates alike!'

Principal Process Engineer, AtkinsRealis

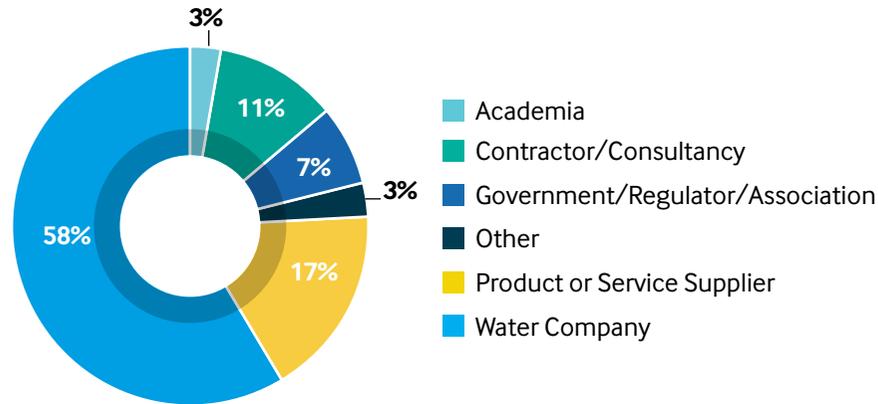

The conference is a great opportunity for myself and the team to hear from the DWI, meet suppliers and discuss their products, see some of the challenges other Water companies have faced and overcome and discuss future challenges in the industry and the research and development to address those challenges.'

Water Quality Manager (London), Thames Water
